Dimple marks the collaboration of Bybeau with Climar, bringing together our high-end bespoke design concepts with the highest quality manufacturing standards. We have established a research and development centre called HAB50 in Águeda where our designs and Climar’s expertise can work hand in hand – and tailor unique, accessible products to a fast-moving market.

Dimple is a modular chandelier system, it is designed to allow unlimited configurations and made from the highest quality handblow glass with a unique two way mirror coated finish, available in a chrome finish, unveiling the extra interior glass ball when it’s on. It offers a flexible modular chandelier system to suit interiors of all sizes, starting from a single pendant through to multiple pendant configurations.

Every Dimple comes with a standard warm white LED chip with 2700K. We have a range of standard dimmable drivers to suit your requirement (1-10, Mains or DALI), equipped with Bluetooth technology (use Bluetooth to Dim and turn on and off your Dimple from the smartphone or other mobile device), also available in RGBW for bespoke projects over 100. Each drop can be individually controlled via DMX to offer unlimited possibilities. The system is designed to work with its own control system or can be triggered by already installed control systems like Lutron or Crestron.

During the day the chandelier work like an organic sculpture with the mirror coating reflecting the natural light and its surroundings. At night it becomes an exquisite light show that can adapt to the moment.
**NAME OF PRODUCT:**
Dimple

**PRODUCT DESCRIPTION:**
Dimple incorporates the highest quality hand blown glass and combines cutting edge technology that allows unlimited configurations. The unique two way mirror-coated finish, available in a chrome finish, unveiling the extra interior glass ball when it’s on.
